

Leak detector to test the tightness of aerosol containers (Monobloc).

- ♦ Indexing unit with 12 pocket starwheel, electronic stepper motor drive
- ♦ 5 testing units with sensor heads equipped for one type of container shoulder
Option: Sensor head for one type of container, diameter 22 - 35 mm
- ♦ Automatic ejection of rejects
- ♦ High sophisticated execution with LCD-TFT display with touch screen. The leak detector is controlled by a PLC system in connection with IPC operating the graphic system
- ♦ Electrical equipment including control cabinet, sensors and control panel, non-explosion proof
- ♦ Capacity: 50 containers per minute

Leak Detector
